CS699 Autumn 2013 Quiz-1 (The Mirror)

Murukesh Mohanan 133059001

August 21, 2013

In this quiz, you will be generating, using latex, a PDF file which looks similar to this PDF file having the questions. You will also be storing all your answers in an svn repository you created for the quiz.

1. Question-1: 2 marks

- Create a local svn repository (which will be accessed using "file://") within the directory svn-repo-quiz1.
- 2. Question-2: 1 mark Start editing your main latex file quiz1-answer.tex, with the text content as in the questions PDF file (you can cut-paste this part). Generate the PDF version of the latex file as quiz1-answer.pdf. This answer PDF should be similar in content to the PDF file with the questions (exact locations of page breaks, exact locations of figures are not important). Add quiz1-answer.pdf into the syn repository and commit.

3. Question-3: 1 mark

Write the following equation in Latex.

$$e^x = \sum_{i=0}^{\infty} \frac{x^i}{i!}$$

4. Question-4: 2+0.5 marks

Plot the following graph using gnuplot by editing the file cdf-plot.gnu. Embed it in latex as eps or pdf; the exact position of the figure is not important. The relevant data is given in files a1.csv and a2.csv

5. Question-6: 1 mark

Refer to the above graph and figure using Latex cross-reference in the following sentence. "Figure 1 is a CDF plot while Figure 2 is a butterfly."

Submission Instructions

- 1. Commit to the svn repository from the working directory
- 2. From within the relevant directory, run "bash prepare-upload.sh"
- 3. Upload the file forupload.tgz created

Figure 1: CDF of the number of retransmissions

Figure 2: Depiction of a symmetric network graph
